

The Personal Companion

features the H2Q star, proportionally flattened. The quality of its effect can be compared to that of the Water Transformer H2QW – but its intensity is approx. three times less. Hence, treating water takes three times as long.

Due to its mild energy, the Personal Companion H2QL is used by more sensitive and highly stressed people. They appreciate its light and supportive vital energy. This precious pendant is highly recommended to be worn the whole day.

The Personal Companion H2QL is available in polished gold, brush-finished and silver.

(Ø 27 × 8,6 mm, 30 g)

H2QL

«I wear it during demanding meetings. I then feel very calm and perspire a lot less.»

Christian, Entrepreneur, Zurich
