

# The Cleaning Drops

are recommended to neutralise undesirable vibrations. Such vibrations can emerge after using the H2Q pendants and the Discovery Rods (described later) for a long time.

The Cleaning Drops H2QT are also appreciated by many users as a universal cleaning agent for jewellery and gem-stones. They are based on a thyme elixir.

Application: pour 3 drops in 0.5 to 2 decilitres of water and then immerse the H2Q products, jewellery or gemstones for a few seconds. The water can be used for several days.

(Ø 24 × 80 mm, 10 ml)

# H2QT

«When I lend the Discovery Rods to people during courses, using the Cleaning Drops to neutralise is a necessity.»

Sandra, Yoga Teacher,  
Freiburg (D)
